- Spanish - Native
- English - Intermediate

STRENGTHS

- Backend architecture
- Database optimization
- Problem solving
- Business logic
- Scalable systems

ENGLISH CV

Daniel Yecid Bobadilla Avila

Software Engineer | Backend Developer | AI & LLM Integration

PROFESSIONAL PROFILE

Software Engineer focused on building high-performance backend systems, robust APIs, and intelligent business tools. Strong Python background with practical experience in FastAPI, Flask, SQL databases, LLM integration, computer vision, and real-time audio processing.

PROFESSIONAL EXPERIENCE

Software Developer

Softpymes SAS

Aug 2022 - Present | Full Time

- Develop backend solutions using Python, Flask, and MySQL for business management systems.
- Build and maintain REST APIs, service layers, data models, and structured application modules.
- Optimize SQL queries, accounting processes, inventory/cost reports, and database performance.
- Support internal tools for licenses, certificates, providers, documents, and operational workflows.

Full Stack Developer

Personal Projects & Consulting

Present | Freelance

- Create custom web applications using FastAPI, Django, Vue.js, JavaScript, and relational databases.
- Integrate AI models, multimedia processing, and external APIs into usable client solutions.

FEATURED PROJECTS

Comunion App

Full-stack church platform with live Bible projection, synchronized reader, admin tools, and digital engagement features.

Cliper

AI-powered tool for transforming long-form videos into short-form reels with intelligent visual tracking.

Shift

Licensing and internal business management system built with Flask, Python, SQL, and REST APIs.

Retention Certificates Portal

Specialized application for provider access and downloading tax retention certificates.

EDUCATION

Software Engineering

Manuela Beltran University

2021 - 2027 expected | Enrolled
